Education

University of Virginia Charlottesville, VA

Bachelor's Degree in Computer Science | GPA: 3.97 | Dean's List. *Aug. 2022 - May 2025*

Coursework: Advanced Algorithms and Implementations, Data Structures & Algorithms, Computer Systems & Organization, Discrete Mathematics & Theory, Software Engineering, Software Development Essentials, Linear Algebra, Introduction to Cybersecurity

Clubs: Google Developer Student Club, Project Code, Founders at UVA, Club Pickleball

Experience

Associate Solution Engineer July 2025 – Present

Appian *Mclean, VA*

- Partnered directly with enterprise customers to diagnose and resolve cloud platform issues across AWS (EC2, IAM, EKS), improving system reliability and minimizing production downtime.
- Supported technical evaluations by troubleshooting Kubernetes-based production deployments, analyzing logs, and restoring service in scalable, highly available environments.

Software Engineering Intern May 2024 – May 2025

Navy Federal Credit Union *Vienna, VA*

- Developed and designed reusable components with HTL, JavaScript, and Sass in an agile team, driving 100K+ user interactions and streamlining cross-team development.
- Refactored 250+ code smells, including memory leaks and redundant logic, using SonarQube, resulting in a 25% reduction in deployment errors and enhanced system maintainability.
- Resolved 100+ security and code quality issues flagged by Checkmarx and BlackDuck, enhancing the security posture of Navy Federal applications.

Undergraduate Teaching Assistant January 2024 – May 2024

University of Virginia *Charlottesville, VA*

- Conducted weekly office hours, assisting 30+ students with complex topics such as CPU architecture, x86 assembly, memory management, and Linux networking.
- Proctored and graded exams and assignments for 175+ students, providing constructive feedback to increase understanding of C programming and system-level concepts.

Projects

EventEase | *Django, PostgreSQL, Amazon S3, GCP*

- Designed and deployed a full-stack, cloud-hosted event planning application using Django and PostgreSQL, supporting authentication, file uploads, and calendar integration.
- Implemented role-based access control, structured relational data models, and AWS S3-backed storage, gaining hands-on experience with data modeling, querying, and cloud services.

HooRides | *React Native, Firebase, GCP*

- Led an Agile Scrum team of three developers to build a cross-platform mobile application using React Native and Firebase for secure ride-sharing within the UVA community.
- Enabled 1,000+ miles of rides across Central Virginia and presented the platform to 10+ faculty and stakeholders, demonstrating real-world adoption and impact.

Skills

Languages: Java, Python, JavaScript, TypeScript, C/C++, SQL, HTML/CSS, XML, Bash
Frameworks: React.js, React Native, Next.js, Node.js, Express.js, Django, Hibernate, Sass, HTL, jQuery, AEM
Tools & Platforms: Git, Linux, PostgreSQL, Grafana, Firebase, Azure, AWS, Heroku, Docker, Kubernetes, Figma
